

## Custom Box Build Assembly

ControlTek offers a full suite of custom box build services, from simple molded enclosures to complex mechanical assemblies.

Many of your products may involve cabling and box build prior to final production. ControlTek's integrated, flexible assembly ensures every aspect of your product fulfillment is managed in-house.

## Mechanical assembly for electronics and box build services.

Whether large or small, ControlTek will deliver precise, quality assembly to each of your box build or frame integration projects.

### Capabilities

- Mechanical Assembly
- Product Testing

ControlTek's production process covers every detail of your project, from assembly instructions and test development down to cosmetic specifications.
